BRUSSELS | 20-22 MARCH 2018

**18TH GENERAL MEMBERSHIP MEETING OF THE
REPRODUCTIVE HEALTH SUPPLIES COALITION**

Systems Strengthening Working Group

Ellen T. Tompsett, Chair

March 20, 2018

Reproductive Health
SUPPLIES COALITION

#ITSABOUTSUPPLIES #RHSUPPLIES2018

SSWG Agenda

14:00 - 14:30	Introduction
14:30 - 15:30	Exploring opportunities to address equipment and consumables shortages in reproductive health service provision
15:30 - 16:00	Last Mile Workstream
16:00 - 16:30	Tea break
16:30 - 17:00	Fireside Chat with the CARhS/CSP GFPVAN TEAM
17:00 - 18:00	Visibility at the Country Level

Introduction

Overview of the SSWG

SSWG Purpose

- Aims to strengthen the global, regional, and country systems needed to ensure reliable and predictable reproductive health (RH) supplies.
- Ensure that these systems are better aligned, more data-driven, and more coordinated.

SSWG Objectives

- Learn: Raise awareness on role of systems and their impact on availability, equity, quality and choice of RH supplies
- Share: Exchange ideas and knowledge about SS
 - Focus on efficiency of the supply chains
 - Draw from relevant trends and developments
- Act: Neutral space to identify systematic challenges and gaps (that cannot be resolved within any one organization) and to work collaboratively to develop responsive solutions

SSWG Initiatives

Workstreams

- CARhs Group
- CSP

Completed

- Business Approach to Transforming Supply Chains
- LAPTOP
- AccessRH/RHI
- PGH

Innovation Fund Grants (completed)

- *PSA/Liberia*
- *i+Solutions/Mozambique*
- *IntraHealth /Kenya*
- *EngenderHealth/Malawi*
- *MSH/Universal Health Coverage*

Common challenge: getting the word out

Questions for today

- What common challenges are we all facing?
- What topic am I excited about and would like to work on with other members in the room?
- What's next for the SSWG?

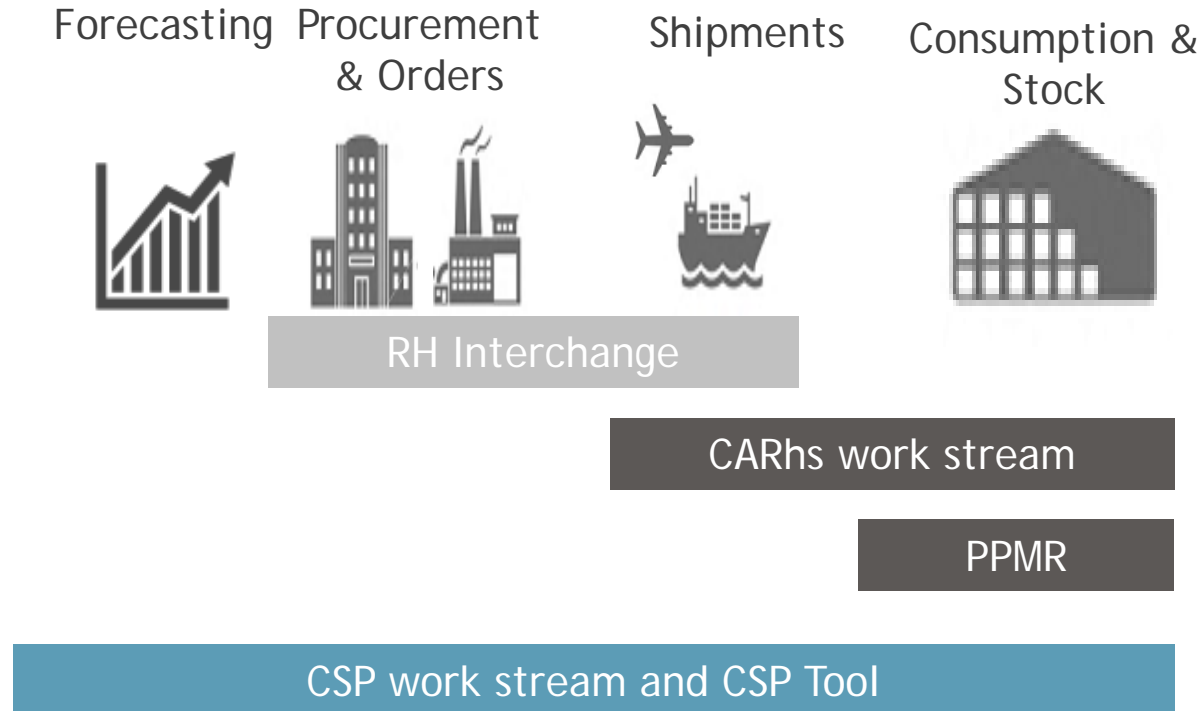

Join me and other SSWG members for lunch tomorrow to discuss how we can move these ideas further

SSWG current workstreams

Introduction to CARhs and CSP

RHSC's history of supply chain visibility

CSP and CARhs continuum

Coordinated Supply Planning (CSP)

- **What is it?**
 - Formed Oct 2012; work stream of the RHSC SSWG
 - Prevention-focused (6-18 months): key global-level partners work to *prevent* FP commodity stock imbalances id'd 6-18 months ahead of time
 - use shared supply chain data and information
 - better coordinate country shipments and the allocation of resources.
 - CSP members: UNFPA, USAID, USAID Global Health Supply Chain - Procurement and Supply Management project (GHSC-PSM), JSI, RHSC, Implant Access Program, and Clinton Health Access Initiative (CHAI)

Coordinated Supply Planning (CSP)

Process

- Monthly calls/annual meetings for country supply planning with multiple donor plans
- Data from PPMR feeds into CSP “Scenario Builder” Tool, within USAID BI&A
- USAID & UNFPA jointly review *medium-long term supply plans* implants & injectables
- Additional production schedule data direct from implant manufacturers is included
- Regular process for forecasting needs and conducting country funding gap analyses

Inventory data:

- PPMR (stock on hand, avg monthly consumption)

Shipment data:

- RHI (UNFPA)
- USAID order data
- Implants supplier shipment files

User dashboard for planning and creating shareable reports

Coordinated Supply Planning Tool

Type: Dataset Aggregator and Tool
Frequency: Depends on data source
Access: RESTRICTED*

PURPOSE

Analysis and visualization tool to improve RH commodity security by promoting shared visibility to future supply needs (6-18 months) to promote coordinated shipment planning and maintenance of adequate stock levels at the country level.

[All Pipeline Report](#) [All UNFPA PPT Report](#) [All Country Stock Out Report](#)

Country: [Dropdown] Product: [Dropdown] /ES: [Dropdown] Program: [All] [Dropdown]

Today is 13-Apr-16 | PPMR Last Refreshed 28-Mar-16 | RHI Last Refreshed 13-Apr-16 | Bayer Last Refreshed 29-Feb-16 | Merck Last Refreshed 29-Feb-16 | USAID Procurement Last Refreshed 13-Apr-16

Tool allows us to assess the impact of a future shipment on stock levels

Coordinated Assistance for RH Supplies (CARhs)

- **What is it?**

- Formed in 2007 as a work stream of the RHSC SSWG
- Response-focused (6 months or less): key global-level partners work to *respond* to imminent FP commodity stock imbalances set to occur within 6 months or less
 - use shared supply chain data and information
 - understand the cause, identify solutions and coordinate a response
- CARhs members: UNFPA Commodity Security Branch (CSB), UNFPA Procurement Services Branch (PSB), USAID, the West African Health Organization (WAHO), USAID Global Health Supply Chain - Procurement and Supply Management project (GHSC-PSM), RHSC, Implant Access Program, Clinton Health Access Initiative (CHAI), FP2020

Coordinated Assistance for RH Supplies (CARhs)

- **Process**

- Monthly calls to review short term commodity issues raised in the PPMR and identify potential solutions:
 - Stock transfers
 - Shipment expediting, canceling, postponing, re-routing
 - New order/shipment creation
 - Technical/policy advice
- UNFPA, USAID, and PPMR Administrators review and identify resolutions

Country public and private sector stock level data from Facility reports, LMIS Reports, Physical Inventories, Pipelines, Sales Reports, and Warehouse Reports, for contraception and condom stock levels as well as expected shipment info from MOH, MSH, GHSC-PSM, SMO, and UNFPA data for 34 countries

Monthly report that describes the stock status of public and private sector contraceptives in 34 countries and flags issues.

PROCUREMENT PLANNING & MONITORING REPORT (PPMR)

Type: Dataset, Report, and Tool
Frequency: monthly/quarterly
Access: RESTRICTED*

PURPOSE

Prevent or mitigate stock-outs by

- Encouraging countries to report standardized data
- Informing both global and national partners of supply situations in countries
